

AMENDMENTS TO THE CLAIMS

The below listing of claims replaces all prior versions, and all prior listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A display device comprising:

a display unit having a plate; ;

a chassis surrounding peripheral edges of the plate and supporting the peripheral edges of the plate; and

a bezel formed on the chassis and holding the peripheral edges of the plate; and

a cover enclosing a back-side surface of the display unit,

the bezel being provided with an extension portion ~~which is extended~~ that extends from a side of the display unit and outwardly projects from beyond an end of the chassis at a level of an upper surface of the cover; and

~~a cover enclosing a back-side surface of the display unit.~~
2. (Original) A display device according to claim 1 wherein the bezel extension portion is disposed in a vicinity of a base portion of the display unit.

3. (Original) A display device according to claim 1 wherein the display unit is arranged in a rectangular formation, and the bezel extension portion is extended from a lateral side of the display unit.

4. (Original) A display device according to claim 1 wherein an inside space is surrounded by end surfaces of the display unit and the cover, and formed beneath a back-side surface of the bezel extension portion, and an electronic part is disposed within the inside space.

5. (Currently Amended) An electronic apparatus comprising:

a display unit having a ~~plate~~,plate;

a chassis ~~and~~ surrounding peripheral edges of the plate and supporting the peripheral edges of the plate;

a bezel formed on the chassis and holding peripheral edges of the ~~plate~~,plate; and

a cover enclosing a back-side surface of the display unit,

the bezel being provided with an extension portion ~~which is extended~~ that extends from a side of the display unit and outwardly projects ~~from beyond~~ from beyond an end of the chassis; ~~and~~

~~— a cover enclosing a back-side surface of the display unit at a level of an upper surface of~~
the cover.

6. (Original) An electronic apparatus according to claim 5 wherein the bezel extension portion is disposed in a vicinity of a base portion of the display unit.

.7. (Original) An electronic apparatus according to claim 5 wherein the display unit is arranged in a rectangular formation, and the bezel extension portion is extended from a lateral side of the display unit.

8. (Original) An electronic apparatus according to claim 5 wherein an inside space is surrounded by end surfaces of the display unit and the cover, and formed beneath a back-side surface of the bezel extension portion, and an electronic part is disposed within the inside space.

9. (Original) A display device according to claim 1 wherein the display device has a height that is equivalent to a total height of the display unit and the cover only.

10. (Original) An electronic apparatus according to claim 5 wherein the electronic apparatus is provided with a display device that has a height that is equivalent to a total height of the display unit and the cover only.

11. (Currently Amended) A display unit comprising:

a plate;

a chassis surrounding peripheral edges of the plate and supporting the peripheral edges of the plate; and

a bezel formed on the chassis and holding the peripheral edges of the plate, the bezel being provided with an extension portion which is extended from a side of the display unit and outwardly projects from an end of the chassis.

12. (Original) A display unit according to claim 11 wherein the bezel extension portion is disposed in a vicinity of a base portion of the display unit.

13. (Original) A display unit according to claim 11 wherein the display unit is arranged in a rectangular formation, and the bezel extension portion is extended from a lateral side of the display unit.

14. (Original) A display unit according to claim 11 wherein an inside space is surrounded by end surfaces of the display unit and a cover, and formed beneath a back-side surface of the bezel extension portion, and an electronic part is disposed within the inside space.
